

## Jae Kwon

### Tech Artist & Student at JHU

#### About Me

Jae Kwon is a Senior Technology & Operations Manager at CJ 4DPLEX Americas. He specializes in process optimization through data-driven approaches, developing solutions for complex mechanical systems, and creating operational strategies that minimize downtime and reduce risk. He also supports cross-functional teams by providing data cleaning and analysis to improve decision-making and efficiency.

He holds a degree in mechanical engineering and is currently pursuing a Master of Science in Data Science at Johns Hopkins University. His academic work builds on more than five years of experience in statistical analysis with R and a growing specialization in Python, machine learning, and data engineering.

Beyond his professional and academic pursuits, Jae has a strong interest in the intersection of art and technology, exploring how creative expression and technical innovation influence one another. He is also passionate about sports—soccer, tennis and more.

## Projects: Modern Software Concepts (2025)

### Module 1 - Web Applications

Building a personal website from scratch using Flask. It contains a navigation bar, home, projects, and contact.
